

aim

When someone approaches us for help, we as pastors, leaders, people-helpers, or as caring individuals within the church, apply every spiritual remedy we know to help them but unfortunately, many people remain in their stuckness. It is not uncommon for us to see people with relational, emotional or spiritual issues move from one person or place to another seeking for relief, healing or answers. In this regard, many of us are unaware of the crucial link between our emotional health and spiritual maturity to our overall wellness as individuals and as a community.

God has given our church the ministry of Pastoral Care, Healing and Deliverance, and Christian Counselling that can provide biblical discipleship that promotes healing and change in our lives. This seminar will help us clarify and understand their roles, and how they are integrated to support and promote holistic wellness in individuals and within the church at large.

For pastors and leaders, this seminar will help you understand and strengthen your roles in the emotional and spiritual well being of your sheep.

For the rest of us, it will help us to know where to seek help in the church when we need emotional and spiritual support.
