

# How Can I Help You To Grow?

With over 20 years of experience in pastoral and missionary leadership, I have started in my own practice as an organisational psychologist. I have a real passion for helping leaders and churches to develop and may be able to assist you through:

## **Speaking about practical topics like:**

- Staying focused as a disciple
- Preventing burnout in pastors
- How congregations can support their pastors
- How leadership teams can support their pastors (seminar)
- Growing as a leader
- How to build stronger marriages (seminar)
- Resolving conflict
- Finding balance in life

## **Counselling support for pastors and leaders**

- Medicare rebate will apply with a referral from a GP or a possible refund from your private health insurance provider without a referral

# Strengths Discovered

## How do all your strengths fit together?

Understanding and developing your strengths will lead to a greater sense of fulfilment and direction in life. Helping your staff discover their strengths will be a positive and encouraging experience.

### The insights gained can help:

- Your staff become more focused and effective
- You as a team leader to position your staff for greater effectiveness and job satisfaction
- To build a stronger, happier and more productive team

## How will it work?

I will lead you and your staff through a process which includes a:

- Resource book and online assessment to identify strengths
- Personal session with each participant to discuss the application of the results
- Session with the team leader to overview the results
- Combined staff meeting to share insights and applications
